

To maximize efficiency and quality control in medication dispensing, Altercare of Ohio recently implemented remote dispensing machines at our locations with high admission rates and advanced levels of care. Our remote dispensing devices are monitored and controlled online 24/7 by Absolute Pharmacy, an Ohio State Board of Pharmacy-approved field leader. The on-site machines automatically package the dosages needed for each nursing shift.

Currently, more than 80 percent of medications are distributed through this remote-monitored system at Altercare's Canal Winchester, Hilliard, Lanfair, Mentor, Nobles Pond and Altercare Post-Acute Rehabilitation Center locations, achieving excellent efficiencies and quality enhancements to patient care, including:

- **Nurses' time:** Prepackaging reduces medication prep and administration time by up to 40 percent, so caregivers can spend more time focusing on our patients.
- **Medication availability:** Medications are immediately available for new admissions and new orders, ensuring smooth care transitions and meeting evolving patient needs.
- **Cuts waste, saves money:** Just-in-time packaging eliminates the waste of unused medications bringing cost of care savings.

Yet another reason to refer your patients to Altercare for continuity of high quality care.
